

University Hospitals Health System Chagrin Highlands Medical Center

Orange Village, OH

Project Description

Client University Hospital
Building Size 100,000 gross square feet
Building Constructed 2000
Building Uses Medical Office Building
Architect van Dijk Pace Westlake

This highly flexible, free-standing medical office building takes advantage of a prominent site to create a welcoming presence for outpatient programs including oncological care and treatment, cardiovascular rehabilitation, internal medicine and women's health within 100,000 gsf of space. The rippling skin of diamond shaped stainless steel shingles and glass is prompted by the freeway location, creating a dazzling and kinetic effect, also allowing visibility into the building waiting areas.
